REMOTE WORKFORCE ON AWS WITH FOGHORN

Make Foghorn your Go-To for
Remote Healthcare Solution Design
and Implementation Needs on AWS

Whether for business continuity in the face of disasters or connecting a global workforce, Amazon Web Services has the tools to quickly and securely deliver seamless cloud centric remote offices. Best-in-breed VPC, VPN, DaaS, application streaming, virtual contact center and collaboration tools connect internal teams and connect your organization to the greater world. Environments can scale quickly with an elastic "pay-as-you-go" pricing structure. For startups not wanting to invest in hardware to the Fortune 500 who want to invest in agile and scalable environments, AWS has built proven and compliant remote workplaces to transform business at the speed of light. Foghorn has been on this frontier with AWS and can guide companies from "how" to "wow." Video Conferencing, Low Latency Telephony, Virtual Desktop Infrastructure. AWS powers innovation and Foghorn empowers customers to help accelerate innovation.

AWS USE CASES TO CONNECT YOUR TEAMS TO THE POWER OF THE CLOUD

TEMPORARY WORKFORCE ONBOARDING

Security Competency

Solution Provider

Foghorn Consulting is an AWS APN Premier Consulting Partner with DevOps and Security Competencies. Their seasoned Cloud and DevOps Engineers design, build and deploy digital transformations that accelerate innovation in the cloud. Over the past decade they have been at the leading edge of Digital Transformation and designed competition rattling and compliant solutions for cutting edge startups to the Fortune 500.

Secure and Compliant Remote Workforce Tools and Services on AWS

Scalable and elastic, AWS's global infrastructure is monitored 24/7 and delivers low latency, secure connections to run your business at the speed of light. With unprecedented economies of scale a cloud based approach can deliver performance upgrades and huge cost savings. Whether you have 10 or 100,000 employees Foghorn can architect a winning design that puts your team on the leading edge of transformation.

TOOLS FOR REMOTE WORKFORCE EMPOWERMENT

AWS VPC > Isolated Section of AWS

AWS VPC > Private AWS Networking Environment

AWS EC2 > Web-scale Compute Capacity

AWS Chime > Online Meeting and Video Conferencing

AWS Connect > Dial in Direct Telephony

AWS Workspaces > Remote Workforce with Cloud Desktops

AWS WorkDocs > Content Creation and Collaboration

AWS AppStream 2.0 > Fully Managed Application Streaming

AWS API Gateway > Secure Front Door for your Application

AWS DUE DILIGENCE CHECKLIST FOR REMOTE WORKFORCE SUCCESS

> Is your organization working from DevOps philosophy?

> Do teams have the tools and process to collaborate remotely?

> Do you have a Bring Your Own Device (BYOD) policy?

> How will you secure uncontrolled devices?

> Will sensitive data be handled in a compliant manner?

> Can disparate stakeholders be unified under comprehensive Cloud Governance Strategy?

> What existing infrastructure investments are relevant to a remote workforce design?

> Has end-to-end encryption been validated when transforming applications and enabling secure communication across untrusted networks?

> Has your organization validated the application features that are required to maintain service quality when delivered remotely?

> Does your organization have the inhouse resources to execute?
