

# FOGHORN'S GCP VPC IN-A-BOX<sup>SM</sup>

Secure, elastic, cost effective, performant solutions for today's enterprise to provision a logically isolated section of Google Cloud Platform.

## Google Cloud Platform's Virtual Private Cloud delivers a private space within their greater Cloud ecosystem.

- > VPCs on GCP deliver secure performance for globally distributed multi-tier applications, as well as application replication and compute capacity for disaster recovery.
- > GCP-hosted or externally-hosted databases also have access to Google's unique machine learning services.
- > A single Google Cloud VPC can span multiple regions without using public internet.
- > Your custom VPC configuration will be delivered in a reusable Terraform module.

### PLUG-AND-PLAY VPC ON GCP

For teams building their first VPC, the depth of configurations and costs can be overwhelming. Foghorn has simplified the process with GCP VPC-in-a-Box.
